

PACKAGING & PACKAGING WASTE REGULATION (PPWR)

Regulation (EU) 2025/40

Supplier Compliance Validation Questionnaire

Minimum Requirements — Applicable from 12 August 2026

Response Deadline: 17 July 2026

Scope of This Questionnaire

This questionnaire covers only the minimum PPWR obligations that become legally enforceable on 12 August 2026. Requirements with later application dates — including harmonised sorting labels / pictograms (August 2028), QR code / Digital Product Passports on packaging (August 2028), and mandatory recycled content targets for plastic (2030) — are excluded from this assessment and will be addressed in separate future questionnaires.

Important Notice

Regulation (EU) 2025/40 entered into force on 11 February 2025. The core obligations listed in this questionnaire become directly binding across all EU member states from 12 August 2026 — with no grace period and no requirement for national transposition. All suppliers providing packaging or packaged goods to our organisation must complete and return this questionnaire by that date. Failure to respond or non-compliance may result in suspension of approved supplier status.

Updated: This questionnaire has been revised to incorporate the European Commission's final Guidance document and FAQ on Regulation (EU) 2025/40, published 30 March 2026. Key updates include: specific PFAS concentration limits and stepwise testing methodology for food contact packaging; clarification that Substances of Concern must be actively minimised with objective evidence; updated references to Articles 38 and 39 and Annex VII for conformity assessment and Declaration of Conformity; and clarification of the 5% plastic threshold that determines whether mixed-material packaging falls within the Annex V single-use plastic bans.

Part A: Supplier Information

Please complete all fields. This information will be held on our supplier compliance register.

Company / Legal Name	YEL TENKE KUTU SAN VE TIC A.Ş
Registered Address	PINARTEPE MAH . YAVUZ SULTAN SELIM BULVARI NO : 4 BUYUKCEKMECE ISTANBUL
Country of Registration	İSTANBUL
Company Registration Number	
VAT / EORI Number	
Primary Contact Name	ÖMER BUKULMEZ
Contact Job Title	QUALITY CONTROL MANAGER
Contact Email Address	kalitekontrol@yelteneke.com.tr
Contact Telephone Number	0 212 872 11 65
EU Authorised Representative (if applicable)	

Part B: Packaging Profile

Describe the packaging your organisation supplies and places on the EU market.

Types of packaging supplied (e.g. primary, secondary, transport, service)

PALLETTE , STRECH ,

Packaging materials used (e.g. plastic, glass, paper/board, metal, wood, composite)

PLASTIC , WOOD , BOARD

Annual volume supplied to us (approximate weight in kg or tonnes per year)

EU member states in which packaging is placed on the market

ENGLAND – GERMANY – POLAND

Role in supply chain: ☒ Manufacturer ☐ Importer ☐ Distributor

MANUFACTURER

Part C: Compliance Checklist — Requirements Applicable from 12 August 2026

Tick Yes, No / Partial, or N/A for each requirement. Where No or Partial is selected, complete Part E with a remediation plan and target compliance date. Where N/A is selected, provide a brief justification in the Notes field or in Part E (e.g. packaging format not applicable, material not used).

C1 Essential Requirements — General Design & Safety (Art. 5)

Requirement	PPWR Article	Yes	No / Partial	N/A
All packaging placed on the EU market meets the essential requirements set out in Annex II of the PPWR	Art. 5(1)	☒	☐	☐
Packaging is fit for purpose: protects contents, enables safe handling, and is compatible with its intended use	Art. 5(1) / Annex II	☒	☐	☐
Heavy metal concentration (Pb, Cd, Hg, Cr VI combined) in packaging does not exceed 100 mg/kg	Art. 5(2)	☒	☐	☐
Packaging does not contain intentionally added PFAS (per- and polyfluoroalkyl substances) above permitted thresholds Note (EC Guidance, 30 March 2026): For food contact packaging, specific concentration limits apply: ≤25 ppb for any individual PFAS; ≤250 ppb for the sum of PFAS (targeted analysis); ≤50 ppm for all PFAS including polymeric PFAS. The EC recommends a stepwise testing approach: Step 1 — total fluorine (TF) content test; Step 2 — pyrolysis-GC/MS to confirm organic vs inorganic fluorine if TF exceeds 50 ppm; Step 3 — direct total oxidizable precursors (TOP) analysis. No exhaustion-of-stock period applies: food packaging exceeding the PFAS limits may not be placed on the EU market after 12 August 2026. Limits apply to the packaging unit as a whole including inks, coatings, adhesives, and lacquers.	Art. 5(3)	☒	☐	☐
Packaging does not contain substances of concern (SoCs) above permitted levels; technical evidence is available on request Note (EC Guidance, 30 March 2026): SoCs are defined in the same manner as under the Ecodesign for Sustainable Products Regulation (ESPR, Regulation (EU) 2024/1781). There is currently no definitive EU list of SoCs and no general concentration threshold (other than heavy metals and the food-packaging PFAS limits). Manufacturers must be able to objectively demonstrate that	Art. 5(4)	☒	☐	☐

the presence of SoCs has been minimised. Suppliers must provide evidence of minimisation, not merely assert compliance.

An EU Declaration of Conformity (DoC) has been prepared for each packaging type per Article 39 and Annex VII of Regulation (EU) 2025/40; where packaging falls under multiple EU legal regimes, a single combined DoC may be used provided all relevant Union acts are clearly identified

Art. 5 / Art. 38 /
Art. 39 / Annex VII

☒
☐
☐

Technical documentation to substantiate the DoC is maintained and available for market surveillance authorities

Art. 38 / Art. 39

☒
☐
☐

C2 Packaging Minimisation & Space Efficiency (Art. 7 & Art. 3(1))

Requirement	PPWR Article	Yes	No / Partial	N/A
Packaging weight and volume are reduced to the minimum necessary to maintain safety, hygiene, and consumer acceptance	Art. 7(1)	☒	☐	☐
Empty space in packaging (void fill) does not exceed 40% of the total packaged volume, unless technically unavoidable	Art. 3(1) / Annex IV	☒	☐	☐
Packaging components can be separated by end-users for correct separate collection and recycling	Art. 7(3)	☒	☐	☐
Packaging does not contain non-functional components that increase weight or volume without purpose	Art. 7(2)	☒	☐	☐

C3 Recyclability Design Requirements (Art. 6)

Requirement	PPWR Article	Yes	No / Partial	N/A
Packaging is designed to be recyclable; materials and components do not prevent industrial recycling	Art. 6(1)	☒	☐	☐
Packaging does not contain materials or coatings that impair recyclability in available collection/sorting/recycling systems	Art. 6(2)	☒	☐	☐
A recyclability assessment or supporting technical evidence is available to demonstrate recyclability on request	Art. 6 / Art. 62	☒	☐	☐

C5 Prohibited Packaging Formats (Art. 22 & Annex V)

Requirement	PPWR Article	Yes	No / Partial	N/A
Single-use packaging formats listed in Annex V as prohibited from August 2026 are not supplied (includes: single-use plastic packaging for unprocessed fresh fruit and vegetables <1.5kg; single-use plastic containers for food/drink consumed on-premises at food service establishments; single-use plastic hotel/hospitality miniatures <50ml; single-use plastic wrapping for single garments at laundry / dry-cleaning) Note (EC Guidance, 30 March 2026): The 5% plastic threshold applies to Annex V points 1–4. Packaging containing 5% or more plastic (by weight of the packaging unit, excluding labels, varnishes, paints, inks, adhesives, and lacquers) is subject to the single-use plastic packaging bans. For example, paper or board packaging with 5% or more plastic content will be treated as single-use plastic for the purposes of these bans. Packaging containing less than 5% plastic is not subject to the Annex V single-use plastic prohibitions. This differs from the scope of the Single-Use Plastics Directive (EU) 2019/904.	Art. 22(1) / Annex V	☒	☐	☐
A review of your full packaging portfolio against the Annex V prohibited formats list has been completed and documented	Art. 22 / Annex V	☒	☐	☐

For Awareness: PPWR Requirements With Later Application Dates

The following requirements are NOT assessed in this questionnaire as they do not apply until after August 2026. Suppliers are encouraged to begin planning for these now.

August 2028:

- Harmonised sorting labels with material-identification pictograms (Art. 12 — implementing act pending; EC final guidance published 30 March 2026)
- QR code / data carrier and Digital Product Passport (DPP) on packaging (Art. 13)

From 2030:

- Mandatory minimum recycled content targets for plastic packaging (Art. 7)
- Only recyclability grade A, B or C packaging may be placed on the market (Art. 6 / Annex II Table 3)

Part D: Supporting Documentation

Indicate which documents you can provide upon request. Tick all that apply. Documents may be requested as part of our audit programme.

#	Document	Available	Not Available	N/A
1	EU Declaration of Conformity (DoC) per Article 39 and Annex VII of Regulation (EU) 2025/40 for each packaging type (a single combined DoC is acceptable where packaging is also subject to other EU legal regimes, provided all applicable Union acts are identified)	☒	☐	☐
2	Technical documentation file substantiating the DoC (material composition, test data, assessments)	☒	☐	☐
3	Heavy metals test report confirming combined Pb/Cd/Hg/Cr VI does not exceed 100 mg/kg	☒	☐	☐
4	PFAS test data or supplier declaration confirming compliance with permitted thresholds (for food contact packaging: ≤25 ppb individual PFAS; ≤250 ppb sum of PFAS; ≤50 ppm total fluorine). EC stepwise testing recommended: Step 1 total fluorine; Step 2 pyrolysis-GC/MS; Step 3 TOP analysis. Non-food packaging: declaration confirming PFAS absence or minimisation	☒	☐	☐
5	Substances of concern declaration for each packaging type	☒	☐	☐
6	Recyclability assessment or technical evidence demonstrating packaging recyclability	☒	☐	☐
7	Packaging minimisation / void fill assessment confirming compliance with 40% empty space limit	☒	☐	☐
8	Evidence of Annex V prohibited format review and portfolio assessment	☒	☐	☐

Part E: Non-Compliance Action Plan

For each No / Partial response in Part C, detail the gap, planned remediation actions, owner, and target compliance date. Add rows as required.

Ref.	Gap Description	Planned Remediation Actions	Target Date	Owner
------	-----------------	-----------------------------	-------------	-------

Part F: Declaration & Sign-Off

I, the undersigned, confirm on behalf of the organisation named in Part A that the information provided in this questionnaire is accurate and complete to the best of my knowledge. I acknowledge that our organisation is responsible for ensuring and maintaining compliance with Regulation (EU) 2025/40 (PPWR) for all obligations applicable from 12 August 2026, and that any material changes to our compliance status will be promptly notified.

I further confirm that all supporting documentation listed in Part D (where marked Available) can be provided upon request within 10 business days.

Signatory Full Name (Print):

ÖMER BUKULMEZ

Date of Completion: 03/08/2026

Signatory Job Title:

QUALITY CONTROL MANAGER

Company Stamp (if applicable):

How to Return This Questionnaire

Please return the completed and signed questionnaire to your designated procurement contact or to:

Response deadline: 12 August 2026. Late responses may result in suspension of approved supplier status pending compliance review.

For questions on PPWR requirements, please contact your procurement manager. Official EU guidance:
https://environment.ec.europa.eu/topics/plastics/packaging_en
